## PROJECTS

---

**BAZAAR** | HTML/CSS, Javascript, React, Material UI, Git, VS Code

May 2023 – Present

- Created a web application BAZAAR, an e-commerce website that allows users to buy products from our web applications.
- Users can browse and search for web applications by category, features, and price. The bazaar also offers a variety of payment options and secure checkout process.
- I learned how to build a complex and fully functional e-commerce website.

**Nike Clone** | HTML, CSS, Javascript, React, Tailwind CSS, VS Code, Git, Vercel App

August 2022

- Developed a Nike clone website as a personal project using HTML, CSS, and JavaScript
- The Application is a single page, It contains information on feature products, special offer, subscribe section etc.
- Developing a Nike clone website was a challenging experience. It helped me to develop my web development skills, learn more about development, and gain experience working with a variety of web development technologies.

## EXPERIENCE

---

**Assistant Teacher** | Tutor-science

2020 – 2021

Science teacher with 5+ months of experience in a high school setting. Proven ability to engage students and make complex scientific concepts understandable.

I was assistant teacher at Adivasi Bal Vikas Vidyalaya Thakurgaon, Ranchi, Jharkhand
